### **About Inspire Therapy**

Untreated Obstructive Sleep Apnea (OSA) can have devastating effects on heart and brain health, impair quality of life, and increase accident risk. Inspire Upper Airway Stimulation (UAS) therapy is an FDA-approved treatment for some people with moderate to severe OSA who are unable to tolerate or get relief from CPAP. In contrast to CPAP, Inspire therapy is implanted inside the body and works with a patient's natural breathing process. Controlled by the patient sleep remote, the system includes a breathing sensor and a stimulation lead powered by a small battery. During sleep, the system senses breathing patterns and delivers mild stimulation to the tongue and other soft tissues of the throat to keep the airway open. Inspire therapy is currently available at more than 60 leading medical centers across the United States and Europe.

### **About Inspire Medical Systems, Inc.**

Inspire Medical Systems, Inc., based in Minneapolis, Minn., was incorporated in 2007 with the sole purpose of developing a safe, effective and well-accepted therapy to help those OSA patients who are unable to tolerate or get relief from CPAP. Inspire therapy is the world's first implantable FDA-approved neurostimulation system for the treatment of OSA. The Company is privately held and investors include Aperture Venture Partners, GDN Holdings, Johnson & Johnson, Kleiner Perkins Caufield & Byers, Medtronic, OrbiMed Advisors, Synergy Life Science Partners, TGap Ventures and US Venture Partners.
